About This Game

Summary

In From the Depths you can build and take first-person command of battleships, planes, submarines, space ships, hot air balloons and more! The game contains a wide range of single player content including:

- A creative mode allowing you to push your designs to the limit and ensure the total annihilation of your opponents.
- A strategic campaign waged over hundreds of islands against eight unique factions.
- A Story Mode where you can play missions as each of the eight factions - a fantastic mixture of strategy, design and wild battles! Defend your fleet against waves of enemy forces in a series of extremely tough challenges.
- Adventure mode where you start on a raft and must build up your fleet and travel a dangerous universe fighting or running from enemy fleets

As well as a wide range of multiplayer content

- Design with your friends in co-op designer

-
- Play a range of adversarial modes
 - Play the entire single player campaign together in co-op

Key Features

- Design and build your fleet, fortresses and structures however you want. There are currently over 1000 unique components blocks, not including 38 different components for making missiles, torpedoes, depth charges and bombs and 34 different components for making the ultimate cannon shell!
- The sky's the limit, you can equip your vehicle with cannons, lasers, mines, bombs, missiles, torpedoes, propellers, rudders, jet engines, wings, hydrofoils, hot air balloons, anchors, fire control computers, blueprint spawners, repair bots, air pumps, automated control blocks and many, many more!
- Realistic physics - every block destroyed or added affects the vehicle's functionality, physics and control. Drag, inertia tensors, buoyancy and sealed compartments are all updated based on the design of your vehicle and the damage sustained.
- Be part of a fantastic community with new releases made on average once a week. Community organised challenges and blueprint sharing make it an extremely friendly place to hang out!
- Loads of single player and multiplayer content in which to use your designs (campaigns, co-op campaigns, missions, adventures)
- Design your own planets/campaigns/missions/multiplayer maps using the planet editor or add your own mods easily using a fully integrated modding interface

Customizable Components

The customizable components in From the Depths allow a unique level of engineering customization:

- Design custom missiles, bombs, depth charges and torpedoes by combining various warheads types, fuse types, IR seekers, laser beam riders, laser designators, thrusters, navigation algorithms, fuel pods, sonar seekers, buoyancy compartments and propellers, to deliver a truly bespoke weapon.
- Design custom cannons by combining four different barrel types and lengths with auto-loaders, warhead types, ammo boxes and auxiliary components to create everything from AA cannons to howitzers.
- Design custom AI by combing an AI mainframe with 'AI cards' slotted into motherboard blocks. Add radar detection, laser detection and tracking and local weapon controllers to give partial or full control to AI. Create anything from a fully AI controlled aircraft carrier to a battery powered drone.
- Design custom engines using crank shafts, cylinders, carburetors, super chargers, exhausts and fuel injectors. Electric engines, generators and chargers are also available for backup power supplies and drones.
- Similar systems exist for the creation of anti-vehicle and anti-missile lasers, drills that can cut even the largest of battleships in half, Particle Cannons, Jet engines, Oil refineries and more

Title: From the Depths
Genre: Action, Adventure, Indie, RPG, Simulation, Strategy, Early Access
Developer:
Brilliant Skies Ltd.
Publisher:
Brilliant Skies Ltd.
Release Date: 7 Aug, 2014

a09c17d780

Minimum:

Processor: Intel Core2 Duo 2.0 GHz (or AMD equivalent)

Memory: 4 GB RAM

Graphics: NVIDIA GeForce 8800GT / ATI Radeon HD 3870 / Intel HD Graphics 4000

Storage: 1 GB available space

Sound Card: DirectX® compatible on-board

Additional Notes: Steam connection required to play the game

I came to this game because i loved ledgend of grimrock 1 and 2 but its just not as good, very poor combat, visuals, inventory and environmental interaction in comparison.. About 20 hours of funny puzzles for a low price (got it in complete pack in discount). It sure is worth the price !!! I recently bought this dlc, with a half price, maybe it still too expensive, but the content is worth much... Good game with mind-breaking puzzles(You must have high IQ). Very good and challenging shoot em up game, if you liked games like R-Type, Salamander and Gadius you should love this game.

The graphics are nice, the soundtracks are excellent and the levels and bosses are well designed.

I have been playing the free version for some time now, and decided to buy this version to support such a great developer to hopefully make more great games like this and Cursed Castilla (a Ghouls n Ghosts type game by the same developer which is also excellent). i bought my 1st computer just for play this kind of games,so im a master about it :D , i tried all the mini racing games in Steam,MBR is the best,if i not mistake i already played this game 2 years ago,but seems improved,realistic evironement is amazing,sure the best purchase during the winter sales 2018 ^^ . It was short, sometimes annoying, mostly fun. And really: write down those number you get on Hard route.. Complete CRAP, DO NOT BUY THIS POS MONEY GRAB of a So-called Game

Not fun, lousy graphics, wonky controls, just plain S#-IT!!!!

ALL OF THE POSITIVE REVIEWS IN THIS THREAD ARE MADE BY THE AUTHOR OR THEIR CRONIES... THE GRAPHICS ARE COMPLETE CRAP... THIS GAME IS NOTHING BUT A WAY FOR THIS PUBLISHER TO GET YOUR MONEY!!! TRASH, JUNK, GARBAGE

A good priced and fun dlc the real board game is like 10X this amount so its good.
only dissapointing this is everybody needs it to play also they just added it where you can buy a copy called unlimited where not everyone needs it.
this is great and fun and hilarious. would reccomend 10V10
totaly worth it no regrets. terrible interface. Fun, but very EA. Would buy again!. knock *knock
FBI OPEN UP!!!!. Beautiful Game. Well worth the price.. Ballsack, go play WarThunder instead. 10/10 must watch
motivate me to git gud in csgo. Just get this on a mobile deivce. It's not good on a computer.. The one time that this game made
it past the loading screen, it seemed like an interesting concept. Much like Banished or Dawn of Man, except childlike.
Unfortunately, of the two dozen times I've launched this game, it's only worked once, coincidentally that was the same time that
the developer was tracking my use for info. It's only loaded that one time. Every other attempt ha ended in frustration and using
task manager to end the process, because it locks my computer. Still waiting for a refund
